NANOscrub

cleaning machines

Scrubber dryers for professionals

FEATURES

- 3-year guarantee
- No tools required to change the brushes/driving disk
 - Easy handling
 - Made in Europe
- Low-noise operation

The NANOscrub cleaning machines from Clean Track offer a wide range of options for the mechanical cleaning of small to medium-sized areas of up to 2,500 m². The various models have working widths from 36 cm to 50 cm and fresh water tanks with a capacity of 11 to 44 liters. The areas to be cleaned can be cleaned quickly, effectively and without long breaks.

The machines are available with a 12V/24V battery drive or as a 230V cable-connected version. This means you can choose the right machine for every application. The NANOscrub B50 MOVE also has an electric drive so that you can clean even faster, easier and more effortlessly. If you are looking for a flexible and efficient cleaning solution, the NANOscrub series is an excellent choice.

Our extensive range of accessories offers the right solution for every cleaning situation and every type of floor. Whether cleaning in cafés, schools, retail, hospitals, offices, fitness studios, commercial kitchens or in workshops and on industrial floors, we have the right accessories to make cleaning as easy as possible for you.

The NANOscrub cleaning machines are durable, reliable and easy to maintain. In addition, all machines from model year 2023 onwards come with a 3-year warranty. This offers numerous advantages for end users and dealers. For more information and warranty conditions, see <https://www.clean-garant.com> or simply contact us.

NANOscrub E36

Hand-guided scrubber dryer

B36

- Compact dimensions
- Including battery, charger (B36) and scrubbing brush

Universally applicable

The NANOscrub 36 scrubber-driers are perfect for small and congested areas. Maneuverable, small, powerful and thorough with 100% freedom of movement. The adjustable flow of cleaning solution and the automatic start/stop function (using a solenoid valve) allow individual adjustment for every surface. The NANOscrub 36 is ideal when it comes to thorough and easy cleaning and the maintenance of floors in confined spaces. The battery-operated version has a 75 Ah battery and therefore a running time of up to 120 minutes on a single charge. This enables continuous work and a wide range of applications with pads and brushes. The battery is fully charged within 12 hours and the machine is ready for use again. The battery-operated design enables extensive freedom of movement. The NANOscrub B36 can be used universally thanks to its maneuverable and simple application and compact dimensions.

Square meter for square meter

Up to 1,260 m²/h can be cleaned with the NANOscrub 36.

Easy to operate

Thanks to the maintenance-free gel battery (B36 only), the clearly arranged controls and the easy-to-change brush with bayonet catch, the NANOscrub 36 is extremely user-friendly.

And away with the dirt!

The dirty water drain hose is easy to operate and ensures convenient disposal of dirty water.

It knows where to go

The robust suction bar is automatically pulled into the correct position and ensures first-class cleaning results.

Preferably curvy

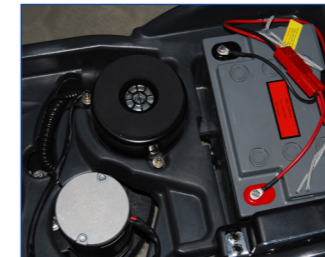

90° bends are no problem with the NANOscrub 36, dirty water is picked up from the floor without leaving any residue.

Small but powerful

Compact, powerful and efficient! Replace your mop and clean with the NANOscrub!

NANOscrub^{POWER} 36

24 V scrubber dryer incl. batteries

- **Automated brush ejection**
- **Ergonomic, infinitely adjustable handle**
- **Eco-Energy mode – Up to 3.5 hours running time on one battery charge**

The **NANOscrub Power36** scrubber dryer is an extremely efficient cleaning appliance with a working width of 36 cm. The appliance is characterized by its easy handling and is ideal for cleaning medium-sized areas of up to 1260 m². This makes the NANOscrub Power36 the perfect choice for wellness and sports facilities, exhibition areas, car dealerships, supermarkets, stores and schools.

The **NANOscrub Power36** is supplied with an on-board charger. The machine can therefore simply be plugged into a socket for charging. It has 2 maintenance-free 36.4 Ah gel batteries, which enable a long operating time until recharging. The scrubbing brush, which is also included in the scope of delivery, ensures effective cleaning.

In addition, optional accessories are available for the **NANOscrub Power36** to further improve the cleaning results and meet the requirements of the respective cleaning tasks. Overall, the NANOscrub Power36 offers an excellent combination of performance, efficiency and ease of use. The device is easy to use, offers a long operating time and is suitable for a wide range of applications.

Simple handling

Clearly laid out and ergonomically arranged control element. All important machine functions such as the on/off switch, water supply, suction and Eco-Energy mode are controlled from here. The working height of the control element is infinitely adjustable.

On-board charger

The on-board charger is always included.

Solid construction

Easy access to all tank openings enables simple maintenance and cleaning.

Practical suction foot

The swivel suction foot ensures good suction results. The rubberized side roller prevents damage to the walls and allows you to work close to the edge. The squeegee is positioned directly behind the brush deck. This achieves a very good cleaning result. The squeegee is raised using an easy-to-operate foot pedal.

NANOscrub B45

24 V scrubber dryer incl. batteries

- Automated brush ejection
- Ergonomic, infinitely adjustable handle
- Eco-Energy mode - Up to 3.5 hours runtime on one battery charge

With its 45 cm working width and 30 liter tank, the **NANOscrub B45** offers a wide range of applications. It impresses with its timeless design, easy handling and compact construction. Ideally suited for cleaning medium-sized areas of up to 1600 m² in wellness and sports facilities, exhibition areas, car dealerships, supermarkets, stores and schools.

The **NANOscrub B45** is supplied fully equipped including on-board charger, 2 maintenance-free 75 Ah gel batteries and scrubbing brush. The machine is therefore ready for immediate use. With fully charged batteries, the running time is up to 3.5 working hours.

The Eco-Energy mode can extend the running time even further. The large dirty water tank is equipped with a drain hose and can also be cleaned easily thanks to the large tank opening. Convenient brush change at the touch of a button. Pad drive plates, 5K universal brushes or abrasive grit brushes are optionally available for the machine. We will be happy to advise you on your individual application.

Solid construction

Easy access to all tank openings. This enables easy maintenance and cleaning.

NANOscrub E50

Hand-guided scrubber dryer

B50 EVO

B50 MOVE

- Including battery, charger (B50 & B50 Move) and scrubbing brush
- 3 versions: 230 V cable, EVO 24 V and Move 24 V with traction drive

The **NANOscrub 50** scrubber dryers are perfect for cleaning car repair shops, supermarkets, fitness centers and health-care facilities. Maneuverable, powerful and thorough with 100% freedom of movement. The adjustable flow of cleaning solution (start/stop function using a solenoid valve) allows individual adjustment for each surface.

The use of different pads and brushes offers a wide range of possible applications.

The **NANOscrub 50** is ideal for thorough and easy cleaning and maintenance of larger surfaces. Thanks to the protected positioning of the vacuum motor, low-noise operation is guaranteed. Changing the brush/pad and suction lips is simple and user-friendly, and the batteries in the B version are fully charged and ready for use within 12 hours.

The walk-behind scrubber-dryer

The NANOscrub 50 is available in three versions. A 230 V version with cable connection and a 24 V version with and without automatic drive.

Clean surfaces efficiently

Suitable for areas up to 2,500 m².

Place of use

Medium-sized uncovered areas such as corridors and hallways, sports facilities, industrial, commercial and educational facilities.

Features

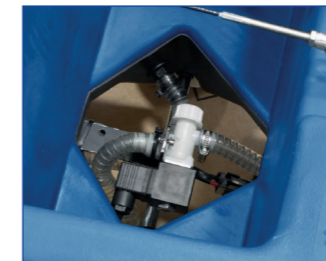

- Simple operation
- Long running times
- Quick and efficient control of the cleaning result
