All pads in our product range have unique differences compared to the other pads. The advantages and recommendations for use are explained below.

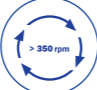

The advantages are assigned to the respective pads. This allows you to quickly find the right pad for your application:

## Explanation of symbols

### Attributes

-  On uneven floors with joints
-  For oil-stained floors
-  With few or no chemicals
-  Can be used on both sides
-  On sports floors
-  Use with plenty of water
-  Recycling material
-  Highly economical
-  Long shelf life

### Type of machine

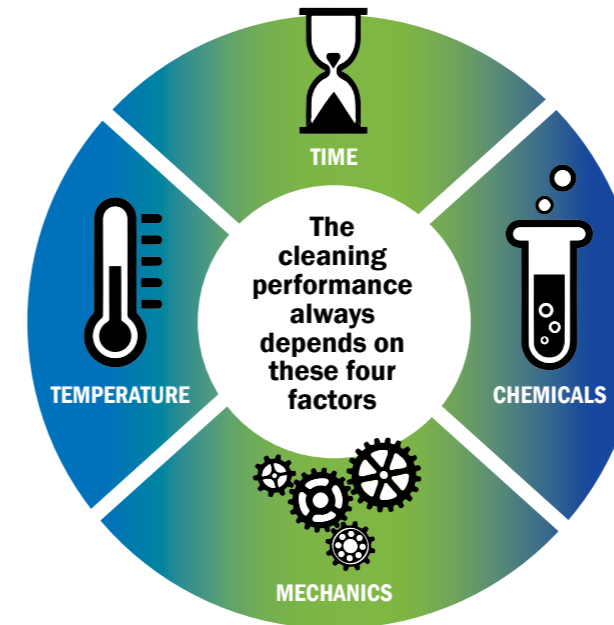

-  Single-disc machine up to 350 rpm
-  Suitable for more than 350 rpm
-  With eccentric machine
-  With automatic cleaning machine

**Sustainable  
AND  
economical**

## Key aspects when working with cleaning pads:

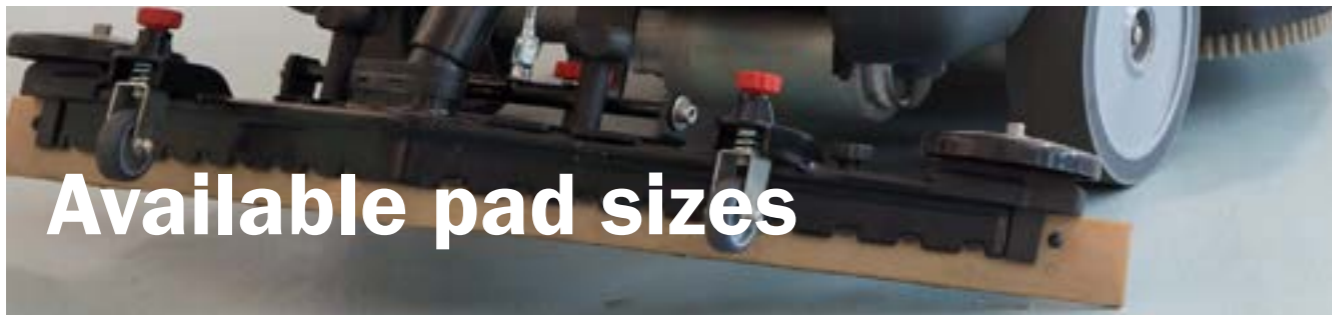

The cleaning performance always results from the perfect combination of 4 factors:

Thanks to improved machine technology, such as that used in orbital and eccentric machines, the time and chemical factors can be significantly reduced. This results in significant cost savings with the same cleaning result.

The use of orbital and eccentric machines increases the demands on the wear resistance of the pads used. Special pads for these applications are marked separately.

# Available pad sizes

# Adhesive coatings

## We recommend the following adhesive coatings:

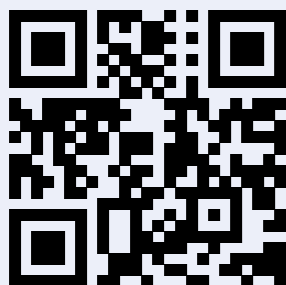

Please refer to the information on the respective pages to find out which adhesive surface is suitable for which pad.

The adhesive coating of the drive plate used ensures the best possible power transmission of the machine to the surface to be cleaned. We generally recommend the following combinations:

Adhesive coatings	Product finder
<b>Full friction</b>	Universal full adhesive covering suitable for almost all pad applications.
<b>Strip friction / velcro</b> for smooth surfaces	  Micro fiber pad      CaP pad
<b>Short-Trim Brush</b> for uneven surfaces e.g. tiles with Tiles grout joints.	 Textile pads like Micro fiber
<b>Sanding disc coating</b>	  Sanding disc      Double sided sanding paper
<b>Pyramid rubber</b>	 Double sided sanding paper Grain size coarser than 40
<b>Felt</b> Double sided sanding paper, grain size coarser than 40	 Double sided sanding paper Grain size coarser than 40

You can find all the adhesive pads mentioned in our online store. If the required drive plate for your machine is not available, please contact our sales team.

You can find our complete pad range in our online store. See here [www.weber-cp.com](http://www.weber-cp.com) or scan the adjacent QR code with your cell phone.

# Full Cycle pads™ 100% recycled-PET – 100% performance

## Full Cycle pads™

- Quickly biodegradable
- high performance
- long service life
- suitable for all soils

## No compromise

Ecology and sustainability come at a price? No. Cleaning performance, dirt absorption and service life meet the highest demands. And at a competitive price. With Full Cycle™ floor pads, you make no compromises.

Full Cycle™ floor pads are available in sizes from 5 to 28 inches and for all standard single-disc machines (up to 3,000 rpm).

Find out more  
[www.americofullcycle.com](http://www.americofullcycle.com)

**JANEX**  
powered by **americo**

Full Cycle™ floor pads are made from 100% recycled plastic fibers. Thanks to their special formulation of recycled PET and water-based resins, they decompose faster than conventional pads. Independent laboratory tests\* show that Full Cycle™ Floor pads biodegrade up to 90% within 14 months of disposal. biodegradation within 14 months of disposal. With conventional pads, this figure is only around 7% over the same period.

\*Laboratory tests according to ASTM standard D5511. The biodegradation process is faster under laboratory conditions than in landfill. Under natural conditions, the complete decomposition of Full Cycle™ Floor pads and other plastic materials depends on various environmental factors (including microorganisms).

**JANEX<sup>®</sup>**

**Optimum performance  
for every application!**

**High dirt holding capacity -  
long operating times**

**Optimum performance!  
For every application –  
on every floor**

**Whether polishing, maintenance cleaning,  
intensive cleaning or basic cleaning – Janex Super  
pads, the right pad for every application!**

Janex Super pads are made of nylon or polyester. The pads have a continuous grain and therefore achieve a long service life combined with consistently good cleaning performance. 100 % cleaning performance is achieved until the pad is completely worn out. Less downtime due to fewer pad changes. Set-up costs are reduced to a minimum.

**How to know the difference:**

Differences in quality between manufacturers of super pads and machine pads in particular are not always apparent at first glance. The differences only become apparent once the pads have been in use for some time and the abrasive grains on the surface are worn. If the pad is not completely grained, the cleaning power and performance of the pad drops rapidly and the pad no longer cleans, but smears and spreads the dirt. Not so with the Janex Super pads!

The continuous grit guarantees almost 100 % cleaning performance until the pad is completely worn down. Another quality feature is the dirt absorption. Compared to supposedly cheaper pads, the Janex Super pads score with a very high dirt absorption capacity. In a price-performance comparison, the Janex Super pads can easily compete with any other comparable machine pad on the market.

The color of the Janex Super pads allows the user to recognize the abrasiveness and the intended application. The pads are available in different colors from light (white) to dark (black). The rule of thumb is: the darker, the more aggressive!

**One system for every surface and every pad application**

Full Cycle<sup>®</sup> product

# Super pads

<b>Colour</b>	white
<b>Graining</b>	none
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25 mm/extra thick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	yes
<b>Application</b>	polishing /dry polishing
<b>Floor</b>	linoleum, polyolefin/PVC, rubber, synthetic resin, wood, stone, natural stone, cork/parquet
High gloss during dry polishing	

## Super pad – white

The white Janex Super pad was specially developed for manual dry polishing. Coated floors can be polished in a single operation. Dull or newly coated floors shine like new again after use. The pad can also be used to work oil and wax into wooden floors. Free from abrasive grains. Gentle polishing without damage or scratches. Can also be used dry.

<b>Colour</b>	beige
<b>Graining</b>	none
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25 mm/extra thick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	yes
<b>Application</b>	incorporation of oil
<b>Floor</b>	linoleum, polyolefin/PVC, rubber, synthetic resin, wood, stone, natural stone, cork/parquet
Gentle polish	

## Super pad – beige

The beige Janex Super pad is used for polishing floors with a soft coating. Light soiling can be easily removed. The pad can be used to work oil and wax into wooden floors. Contains very fine abrasive particles. Gentle polishing without damage or scratches.

<b>Colour</b>	red
<b>Graining</b>	none
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25 mm/extra thick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	yes
<b>Application</b>	cleaning
<b>Floor</b>	linoleum, polyolefin/PVC, rubber, synthetic resin, wood, stone, natural stone, cork/parquet
Removes light scratches and dirt	

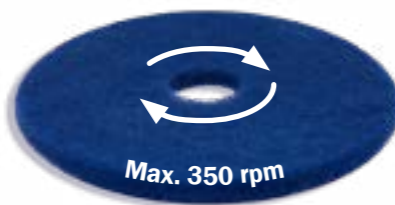

## Super pad – red

The red Janex Super pad is used for daily maintenance cleaning. Heel marks and light soiling are reliably removed. The pad produces a slight shine on the floor. It contains very fine abrasive particles and achieves a good cleaning effect. The pads can be used with all commercially available cleaning agents.

<b>Colour</b>	blue
<b>Graining</b>	abrasive media of medium abrasiveness
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25 mm/extra thick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	yes
<b>Application</b>	cleaning
<b>Floor</b>	linoleum, polyolefin/PVC, rubber, synthetic resin, wood, stone, natural stone, cork/parquet
Effectively cleans heavily soiled surfaces + dry film remediationg	

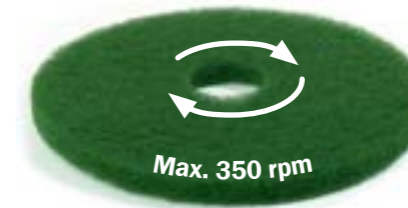

## Super pad – blue

The blue Janex Super pad has been developed for maintenance, intensive and intermediate cleaning on non-sensitive hard floors. It is mainly used for cleaning natural, artificial stone and rubber floors. It can also be used for dry film restoration. The pad cleans heavily soiled surfaces effectively and thoroughly. It contains abrasive particles of medium abrasiveness for effective dirt removal. The pads can be used with all commercially available cleaning agents.

<b>Colour</b>	green
<b>Graining</b>	abrasive media of medium abrasiveness
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25 mm/extra dick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	yes
<b>Application</b>	cleaning
<b>Boden</b>	linoleum, polyolefin/PVC, rubber, synthetic resin, wood, stone, natural stone, cork/parquet
Maintenance cleaning & intensive cleaning	

## Super pad – green

The green Janex Super pad has proven itself for maintenance and intensive cleaning on hard floors. It removes stubborn dirt from PVC and linoleum floors. The pad cleans heavily soiled surfaces effectively and thoroughly. It contains abrasive particles of medium abrasiveness for effective dirt removal. The pads can be used with all commercially available cleaning agents.

<b>Colour</b>	brown
<b>Graining</b>	abrasive media coarse abrasiveness
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25 mm/extra dick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	Ja
<b>Application</b>	Grundreinigung
<b>Boden</b>	linoleum, Polyolefin/PVC, Gummi, Kunstharz, Holz, Stein, Naturstein, Kork/ Parkett
removes stubborn soiling, old care films and other residues	

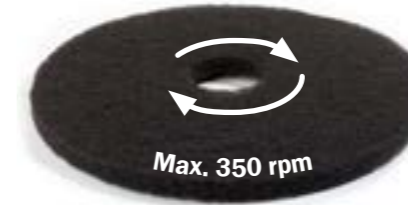

## Super pad – braun

The brown Janex Super pad can be used for effective basic cleaning on all non-sensitive hard floors. Stubborn dirt, old coatings and care films as well as almost all other residues on non-sensitive hard floors are removed quickly and thoroughly. It contains abrasive particles with coarse abrasiveness, removes old care films and has strong abrasiveness. The pads can be used with all commercially available cleaning agents.

<b>Colour</b>	black
<b>Graining</b>	abrasive media very coarse abrasiveness
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25 mm/extra dick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	yes
<b>Application</b>	cleaning
<b>Floor</b>	synthetic resin, wood, stone, natural stone, cork/parquet
Removes old care film coatings and coatings	

## Super pad – black

**Black Super pads are too soft?**  
On the next page you will find our abrasive pads with maximum cleaning performance for the toughest cleaning and decoating jobs!

The Janex Super pad black is the pad with the highest sanding performance in the Janex standard pad range. It can be used for the same applications as the brown pad. It also provides excellent cleaning results when cleaning concrete and industrial floors. It contains abrasive particles with very coarse abrasiveness and removes old maintenance films. The pads can be used with all commercially available cleaning agents.

## Pad alternatives in our online shop:

### Normal pads

Normal pads are similar to super pads in terms of their properties, composition and cleaning performance. The thickness of the Normal pads is 11 mm. Normal pads are available as round floor cleaning pads and as hand pads.

### Floorida pads

Floorida pads is Weber's own brand for price-conscious customers. The material for the Floorida pads is produced on the basis of our many years of experience in the manufacture of cleaning pads. The properties correspond to those of the Janex Super pads as described above.

# Abrasive pads

JANEX®

## Machine recommendation

## Features

Full Cycle® product

## Abrasive pads for efficient removal of sealing layers

Use with water-based floor cleaning solutions to remove worn and dirty sealers or old maintenance films. HiAbrasive pads can also be used on heavily soiled floors with hard surfaces such as concrete with the appropriate cleaning solutions. They can be used on single-disc machines and scrubbing machines. Ideal for use at machine speeds of up to 350 rpm.

## High abrasion resistance - extra durable!

### Features

HiAbrasive pads are constructed from polyester fibers in an open structure of non-woven fabric. Abrasive particles are distributed throughout the fabric and bonded to the fibers with highly durable adhesives.

### Instructions for use

To avoid damaging the floor covering, the floor should be swept clean before carrying out the basic cleaning.

## Grinding/decoating

Floor pad	HP 500	HiPro	Titan Black	Black
Very aggressive – for the most difficult decoating tasks	✓			
Insensitive to intensive chemicals	✓			
High-performance decoater		✓		
Removes coating quickly and easily		✓		
Ideally suited for the removal of painted coatings			✓	
Open pad structure facilitates pad suction weight			✓	
General decoating				✓
Inexpensive decoating option				✓

Max. abrasion

Colour	grey
Graining	very high abrasiveness
Material	recycled polyester fiber
Thickness	25 mm
Inner hole Ø	85 mm
Double-sided	yes
Application	maintenance cleaning
Floor	insensitive floor such as natural stone, concrete, terrazzo
Use	wet

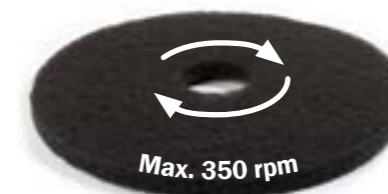

## Titan

The Titan Black pad has been specially developed for the toughest coating removal tasks. It can remove several layers of coating in one operation. The superior resistance to chemical cleaners makes the pad very durable.

Colour	black
Graining	very high abrasiveness
Material	recycled polyester fiber
Thickness	25 mm
Inner hole Ø	85 mm
Double-sided	yes
Application	maintenance cleaning
Boden	insensitive floor such as natural stone, concrete, terrazzo
Use	wet

## Dominator Hi Pro

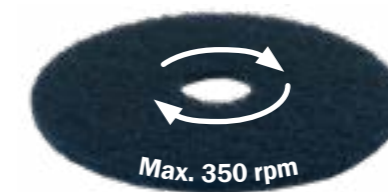

The HiPro pad is ideal for thorough and in-depth decoating. It removes stubborn layers of dirt and old coatings. Its use leads to quick results and makes the Dominator pad a very economical option.

High abrasion

Colour	black
Graining	very high abrasivenessbb
Material	recycled polyester fiber
Thickness	25 mm
Inner hole Ø	85 mm
Double-sided	yes
Application	maintenance cleaning
Boden	insensitive floor such as natural stone, concrete, terrazzo
Use	wet

## HP 500

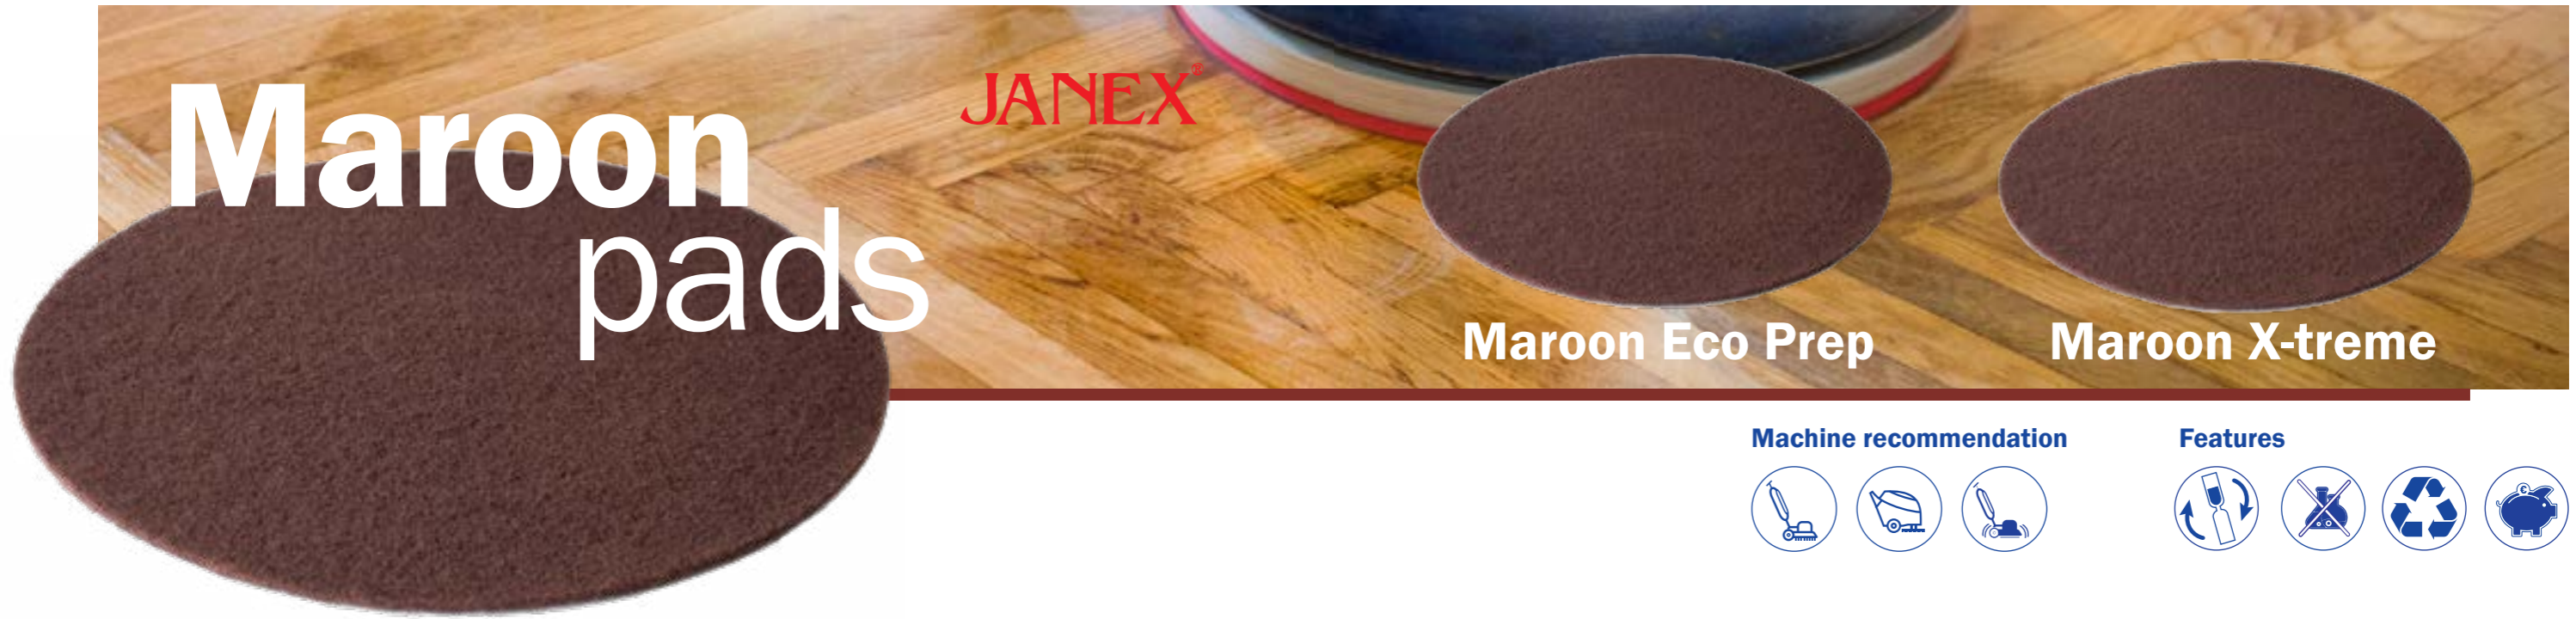

The HP 500 pad consists of polyester fibers processed in an open non-woven structure. Abrasive particles are distributed throughout the fabric and attached with a very durable adhesive. This pad has a very high abrasive content and superior chemical resistance.

Further information can be found in the WCP online shop <https://www.weber-cp.com>

#### Machine recommendation

#### Features

## Maroon pads

### High-performance floor restoration pads

Ideal for demanding wood floor repairs to quickly remove coatings from floors such as vinyl, terrazzo and wood

For removing worn or soiled floor coverings and sealants. The pads are used together with a water-repellent stripper solution. They can also be used to clean heavily soiled floors with a hard surface, such as concrete. For use on single-disc machines and scrubbing machines.

Ideal for machines with speeds of up to 350 rpm.

## Basic cleaning without chemicals!

The Maroon pads can be used wet or dry. We recommend using the Maroon pad with water and without chemicals. For stubborn coatings, additional chemicals and/or the Maroon X-treme pad can be used.

Maroon pads are particularly effective when used in conjunction with orbital or eccentric machines such as the CT Q!. When dry sanding, please be sure to use a dust extractor. This prevents harmful dust from being released into the room air.

<b>Colour</b>	maroon
<b>Graining</b>	very high abrasion
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	11 mm
<b>Inner hole</b>	
<b>Double-sided</b>	yes
<b>Application</b>	Maintenance cleaning
<b>Floor</b>	insensitive floor such as natural stone, concrete, terrazzo
<b>Use</b>	wet/dry

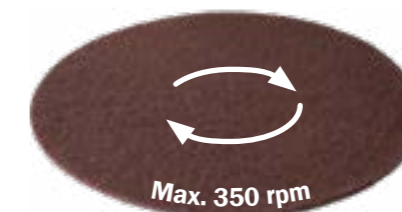

### Maroon Eco Prep

Maroon pads can be used wet or dry. The use with water and without chemicals is recommended. For stubborn coatings, additional chemicals and/or the Maroon X-treme pad can be used. The Maroon pads can be used particularly effectively in conjunction with orbital or eccentric machines.

<b>Colour</b>	maroon
<b>Graining</b>	very high abrasion
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	11 mm
<b>Inner hole</b>	
<b>Double-sided</b>	yes
<b>Application</b>	Maintenance cleaning
<b>Floor</b>	insensitive floor such as natural stone, concrete, terrazzo
<b>Use</b>	wet/dry

### Maroon X-treme

The Maroon X-treme restoration pad can be used wet or dry to remove old coatings from almost all hard-wearing floor coverings. Compared to the Maroon Eco Prep pads, the X-treme version is more aggressive and the right choice for even the most demanding cleaning jobs. The material lasts longer and wears more evenly. The material has a denser composition and contains more abrasive particles.

Full Cycle® product

Further information can be found in the WCP online shop <https://www.weber-cp.com>

**We recommend placing a second Maroon pad between the drive plate and the adhesive pad during application. This protects the drive plate from damage.**

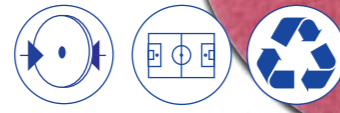

# Flamingo pads

# JANEX® Tile pads

### Machine recommendation

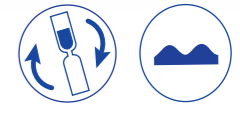

### Features

### Machine recommendation

### Features

## Flamingo pads

Flamingo pads are used in machine maintenance cleaning. They are used wet and optionally with cleaning chemicals. Flamingo pads are suitable for maintenance cleaning of linoleum, PVC or rubber floors. They are particularly suitable for cleaning sports floors. Ideal for use with scrubbing machines (up to 1,000 rpm).

## Ideal for daily maintenance cleaning!

The robust design and open structure enable optimum cleaning performance on all hard floors. Light soiling and scuff marks, such as black heel marks, are reliably removed in a single operation. Flamingo pads prepare the floor for polishing.

## JANEX® Tile pads

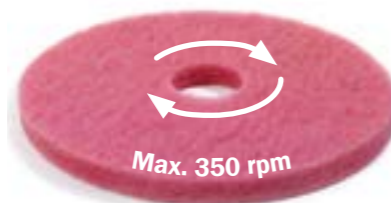

The lawn pad is a floor cleaning pad with brushing properties. Ideal for cleaning deep joints and uneven floor surfaces with incomparable results. Recommended for use on machines up to 500 rpm. The lawn pad combines scrubbing and brushing in one pad. This saves the use of different cleaning tools and therefore time.

## For structured and uneven floors

The lawn pad cleans effectively with just water or neutral detergent. Lawn pads are not laminated. This allows the unrestricted flow of water or cleaning fluid when a scrubbing machine is used. The design without darts allows for edge-to-edge cleaning power. The pad is ideal for grouted tile floors, terrazzo and concrete.

<b>Colour</b>	pink
<b>Features</b>	low abrasiveness
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	25mm/extra thick
<b>Inner hole</b>	Ø 85 mm
<b>Double-sided</b>	yes
<b>Application</b>	cleaning, removes soiling, scuff marks & heel marks in one operation
<b>Floor</b>	Linoleum, PVC, concrete, rubber floors, sports floors
<b>Machine</b>	automatic cleaning machine, scrubber dryer
<b>Use</b>	wet/dry

### Flamingo pad

The open structure of the Flamingo pad enables optimum cleaning performance. Light soiling, such as black heel marks, is reliably removed in a single operation. Flamingo pads in use in preparation for polishing.

<b>Colour</b>	green
<b>Features</b>	low abrasion
<b>Material</b>	recycled polyester fiber
<b>Thickness</b>	20 mm
<b>Double-sided</b>	no
<b>Application</b>	Cleaning of terrazzo, concrete, in joints and uneven floors
<b>Machine</b>	All floor cleaning machines and especially orbital and eccentric machines
<b>Use</b>	wet/dry

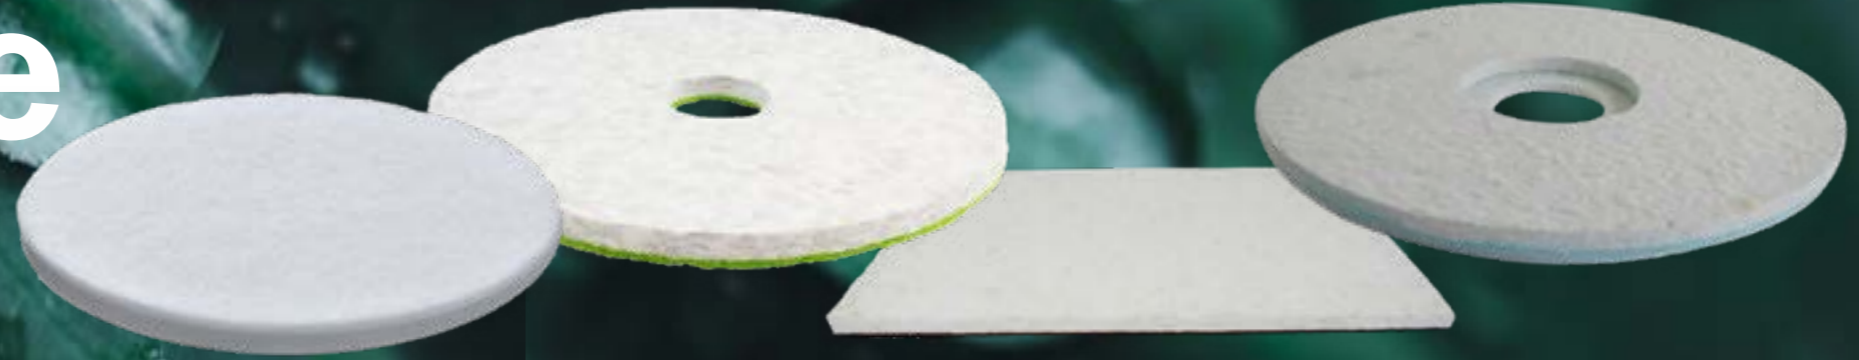

### JANEX® Tile pad green

The lawn pad is made from robust long lasting turf material and provides the best cleaning results. It is ideal for daily maintenance cleaning with automatic cleaning machines. The turf pad offers a long service life combined with consistently good cleaning performance.

# Melamine pads

## Melamine pads

Only high-quality materials are used in the manufacture of Janex melamine pads. The patented material composition of the Komb-X, HD+ and Orbo+ pads guarantees the best cleaning results with results with less wear and tear compared to standard melamine and melamine mix pads.

- Economical – low wear, less use of chemicals use of chemicals and avoidance or delay of basic cleaning work lead to immediate cost savings.
- Patented material composition for the Komb-X, HD+ and Orbo+ pads. The melamine foam cleans and absorbs dirt. The PU foam binds the materials together, ensuring a long service life for the material and reducing the absorption of water. When used with automatic cleaning machines, this protects the battery as less power has to be called up.

## Ideal for porcelain stoneware and textured safety tiles

- Melamine pads are not only a problem solver for the removal of gray haze on porcelain stoneware tiles, but can generally be used for basic and maintenance cleaning of water-resistant, resilient hard floors.
- Melamine pads are not only a problem solver for the removal of gray haze on porcelain stoneware tiles, but can generally be used for basic and maintenance cleaning of water-resistant, resilient hard floors.

# Melamine pads

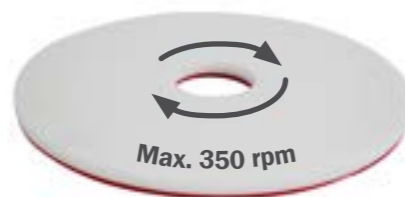

## APPLICATION

### Maintenance- and intensive cleaning

<b>Colour</b>	white/red
<b>Material</b>	Melamine foam carrier material polyester
<b>Thickness</b>	20 mm
<b>Inner hole</b>	Ø 80/85 mm
<b>Double-sided</b>	no
<b>Application</b>	cleaning of water-resistant floors
<b>Use</b>	wet

### Melamine W-pad

**Melamine W-pads** – melamine foam. The high melamine content results in very good cleaning performance. The patented pads are perfect for intensive cleaning of all non-structured and water-resistant hard floors. Compared to the S-pad, the W-pad has a higher density and therefore a higher frictional force.

### Machine recommendation

You can find the melamine S-pads in our online store. These have a lower density than the W-pads and are therefore easier to get into joints and recesses.

## APPLICATION

### Maintenance- and intensive cleaning

<b>Colour</b>	white/green
<b>Material</b>	Melamine foam with PU foam
<b>Thickness</b>	20 mm
<b>Inner hole</b>	Ø 80/85 mm
<b>Double-sided</b>	no
<b>Application</b>	cleaning of water-resistant floors
<b>Use</b>	wet

### Komb-X pad

**Komb-X pads** – a material mixture of 70% melamine foam and 30% PU foam. The high proportion of melamine results in very good cleaning performance. The PU foam ensures perfect cohesion and reduces wear. The patented pads are perfect for intensive cleaning of all non-structured and water-resistant hard floors. The surfaces must not be varnished.

### Machine recommendation

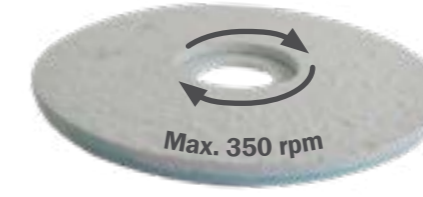

## APPLICATION

### Maintenance cleaning

**SAVES THE BATTERY – FOR A LONGER SERVICE LIFE**

<b>Colour</b>	white/turquoise
<b>Material</b>	melamine foam with PU foam
<b>Thickness</b>	25 mm / carrier material 10 mm
<b>Inner hole</b>	Ø 80/125 mm
<b>Double-sided</b>	no
<b>Application</b>	cleaning of water-resistant floors
<b>Use</b>	wet

### HD+ pad

**HD+** – for effective maintenance cleaning, ideally using a scrubber dryer. With robust backing material, from Ø 305 mm, round inner hole 85 mm incl. round opening in the foam part for easy mounting on the drive plate with inner hole holder/center-lock. Standard sizes in stock – from 11 inches (280 mm) up to 21 inches (530 mm) PU: 4 pieces per box.

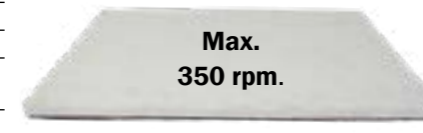

### Machine recommendation

## APPLICATION

### Basic- and maintenance cleaning

<b>Colour</b>	white/green
<b>Material</b>	melamine foam with PU foam
<b>Thickness</b>	25 mm / carrier layer 1 mm
<b>Double-sided</b>	no
<b>Anwendung</b>	cleaning of water-resistant floors
<b>Use</b>	wet

### Orbo+ pad

**Orbo+** – for orbital/eccentric machines. With hard-wearing Velcro fastener on the back. Available sizes: in rectangular shape 14 x 20 inch, 14 x 24 inch, 14 x 28 inch, 14 x 32 inch – PU: 4 pieces per box, in round shape 12 inch (305 mm) and 17 inch (430 mm) – PU: 5 pieces per box.

### Machine recommendation

Further information can be found in the WCP online shop <https://www.weber-cp.com>

# Micro fiber pads

## Micro fiber pads

Micro fiber pads are ideal for cleaning porcelain stoneware tiles and textured surfaces. They loosen dirt from micropores and offer high, effective dirt and moisture absorption. The application protects stone floors and porcelain stoneware tiles from greying. Easy handling is complemented by easy cleaning (60°C in the washing machine, no fabric softener, no dryer).

**Colour** white  
**Material** micro fiber  
**Thickness** 11 mm  
**Application** stone floors, porcelain stoneware  
**Use** wet  
**Application area:**

### Low pile white

**60°**  
 Material: synthetic fiber  
 Short Fiber -  
 for even, flat surfaces

**Colour** white  
**Material** micro fiber  
**Thickness** 11 mm  
**Application** stone floors, porcelain stoneware  
**Use** wet  
**Application area:**

### High pile White

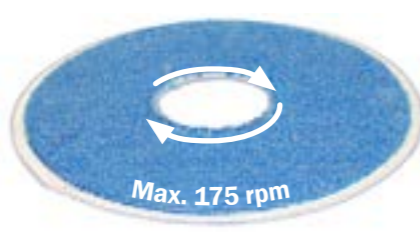

**60°**  
 Material: synthetic fiber  
 Long fibers - For cleaning uneven surfaces (e.g. tiles with joints)  
 Material thickness: 11 mm

**Colour** blue  
**Material** micro fiber  
**Thickness** 11 mm  
**Application** stone floors, porcelain stoneware  
**Use** wet  
**Application area:**

### Blue bristle

**60°**  
 Material: synthetic fiber

## Bonnets

Ideal for textile floor coverings. The gentle cleaning properties and easy handling (spray on, place the Bonnet on the drive plate and start) make the Bonnets the ideal companion for industrial and floor cleaning.

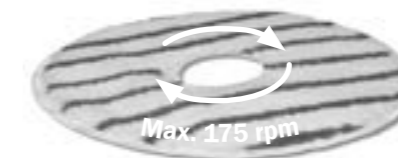

## Carpet pads CaP

This pad is a new type of pad for basic and intermediate cleaning of textile floor coverings. The pad is used on both sides and offers the best results when removing coarse and fine soiling.

**Colour** white with grey stripes  
**Material** micro fiber  
**Thickness** 11 mm  
**Double-sided** yes  
**Application** stone floors, porcelain stoneware  
**Use** wet  
**Application area:**

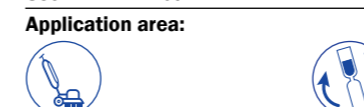

### Grey pad stripes

**60°**  
 Material: synthetic fiber, short fibers with harder, gray stripes -for intensive cleaning tasks  
 Material thickness: 11 mm

**Colour** white with green stripes  
**Material** polyester/rayon  
**Thickness** 25 mm  
**Double-sided** yes  
**Application** carpet cleaning  
**Use** wet  
**Application area:**

### Bonnet - Medium Duty

**60°**  
 Bonnet pads are used for carpet shampooing  
 Material thickness: 25 mm

**Colour** white/grey  
**Material** polyester  
**Thickness** 11 mm  
**Double-sided** yes  
**Application** carpet cleaning  
**Use** wet  
**Application area:**

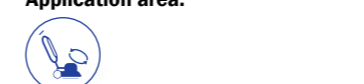

### Teppich pad CaP

**40-60°**  
 Material: synthetic fiber  
 CaP pads are used for used for carpet cleaning. Unique application due to two different surfaces: First side with mesh for pre-cleaning and removing light soiling. Second side for fine cleaning.

**Colour** orange  
**Material** Micro fiber  
**Thickness** 25 mm  
**Application** wood and parquet floors  
**Use** wet  
**Application area:**

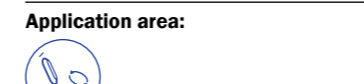

### Janex Powerclean HD

**60°**  
 Material: synthetic fiber  
 Material thickness: 25 mm

**Colour** grey  
**Material** Micro fiber  
**Thickness** 25 mm  
**Application** wood and parquet floors  
**Use** wet  
**Application area:**

### Janex Powerclean HD

**60°**  
 Material: synthetic fiber  
 Material thickness: 25 mm

**Machine recommendation**

**Features**

**ONE system for ALL cases**

**Brilliant prospects – for all hard floors!**

The Juwex system replaces basic and special cleaning. Economical, environmentally friendly and simple.

Juwex® pads only require clear water. This saves you the selection and time-consuming dosing of chemical cleaning products.

It couldn't be simpler. Whether linoleum or concrete, PVC or synthetic resin, natural or artificial stone tiles – Juwex® pads are the perfect solution for all hard floors. Special crystalline microparticles with excellent abrasive properties ensure a unique brilliance.

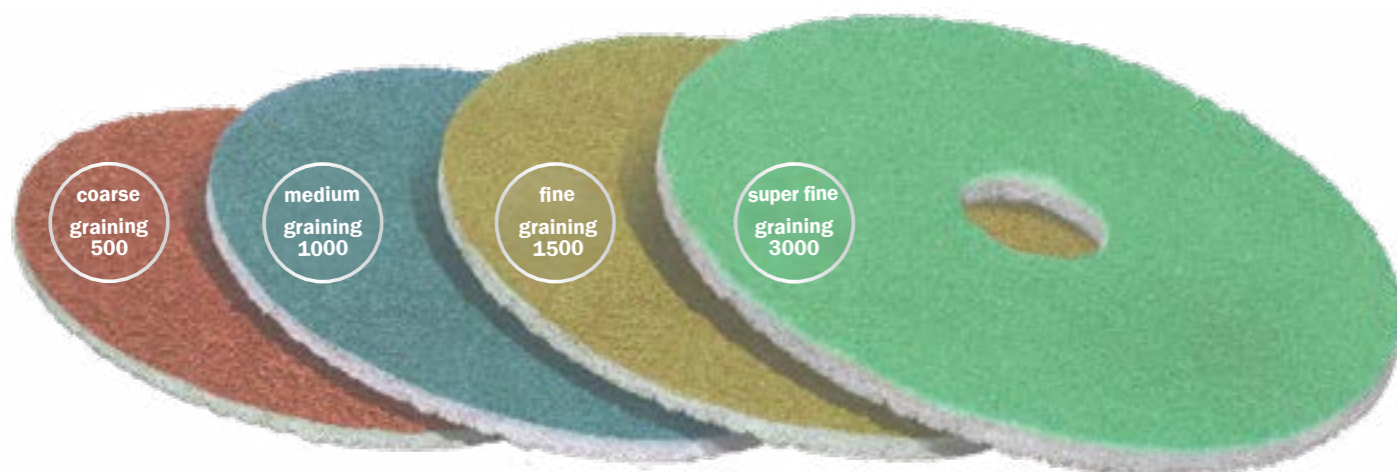

Four grit sizes with different degrees of hardness result in an optimally coordinated system for basic and maintenance cleaning.

Juwex® was specially developed for large surfaces in supermarkets, shopping centers, airports, hospitals and schools.

Each pad has a different grain size and fulfills different functions.

**Four pads for every need**

- ideal for heavily worn and dirty surfaces
- removes minor scratches and dirt
- for clean, matt surfaces
- ideal preparation for treatment with Juwex® pads „Blue“

Full Cycle® product

Further information can be found in the WCP online shop <https://www.weber-cp.com>

<b>Colour</b>	red
<b>Material</b>	polyester enriched with crystalline microparticles
<b>Thickness</b>	25 mm
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

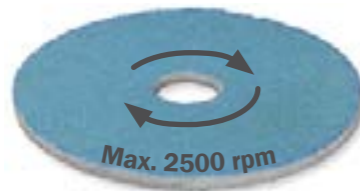

### JUWEX® red

**Coarse grit 500 – pre-treatment**  
A thorough pre-treatment with red **Juwex®** pads is recommended for heavily worn and soiled surfaces. The coarse grit allows stubborn stains to be effectively loosened and removed. Pre-treatment is complete after about five passes.

<b>Colour</b>	blue
<b>Material</b>	polyester enriched with crystalline microparticles
<b>Thickness</b>	25 mm
<b>Application</b>	removes small scratches and unevenness, surface is sealed, for smooth, clean and silky matt surfaces, ideal preparation for treatment with Juwex® pads „Yellow“ and „Green“
<b>Use</b>	wet

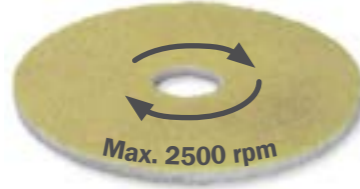

### JUWEX® blue

**Medium grit 1000 – cleaning**  
The blue **Juwex®** pads remove minor scratches or unevenness. The floor is cleaned and prepared for polishing. During this time, the floor appears dull. After five passes, the floor has a silky matt sheen.

<b>Colour</b>	yellow
<b>Material</b>	polyester enriched with crystalline microparticles
<b>Thickness</b>	25 mm
<b>Application</b>	gentle polishing, ideal preparation for treatment with Juwex® pads „Green“
<b>Use</b>	wet

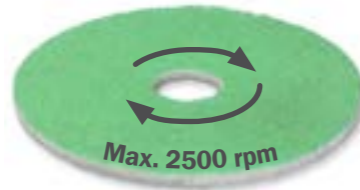

### JUWEX® yellow

**Fine grit 1500 – polish**  
Yellow **Juwex®** pads are used to clean and polish the floor at the same time. After five passes, the floor is given an elegant satin sheen.

<b>Colour</b>	green
<b>Material</b>	polyester enriched with crystalline microparticles
<b>Thickness</b>	25 mm
<b>Application</b>	for lasting shine
<b>Use</b>	wet

### JUWEX® green

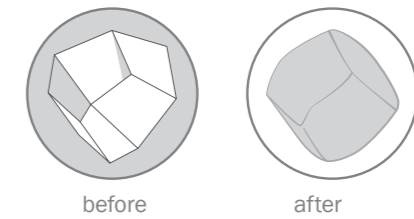

**Finishing grit 3000 – finishing**  
For lasting shine and slip resistance (with regular use). Daily use maintains the floor and improves the polish at the same time.

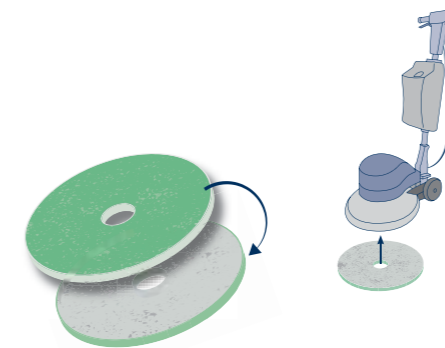

Further information can be found in the WCP online shop <https://www.weber-cp.com>

Conventional diamond pads blunt and quickly become „diamond-like“.

All four steps of the **Juwex®** cleaning process can also be carried out directly one after the other. As with maintenance cleaning, the sequence should also be maintained here in order to achieve optimum results. **As a rule of thumb: 100 m<sup>2</sup> per hour (with an 85 cm wide seat).**

## Mounting

When mounting, please make sure that the colored side is facing downwards.

### Advantages

- Special coating: Fine, extremely hard microparticles
- Effective cleaning and polishing
- Long service life
- Unique fabric structure: No overheating
- High dust absorption

### Application tips

- The higher the contact pressure and the speed of the machine, the faster you achieve the desired result.
- Use powerful cleaning equipment.
- Avoid wasting time by charging too early or unnecessarily

### Notes

- Suitable for all common single-disc machines and automatic cleaning machines.
- Suitable for high speeds (up to 2,500 rpm).
- Suitable for wet and dry cleaning.

# High Speed

- Champagner
- UHS Peach
- UHS Blue
- Aqua Light

## For high speeds!

### Effective cleaning and polishing!

High Speed pads are designed for floor polishing. They are ideal for use on machines with speeds of up to 3,000 rpm and can be used on both sides.

A variable mix of materials (synthetic fibers and natural bristles) ensures low frictional heat. Suitable for all floors. High Speed pads are special pads for use with polishing machines. Depending on the hardness of the coating, frequency of use and desired shine, there is a suitable pad for every situation.

<b>Colour</b>	Ultra Ivory
<b>Material</b>	polyester 100% recycled
<b>Thickness</b>	25 mm
<b>Inner hole</b>	85 mm
<b>Double-sided</b>	yes
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

### M44 Ultra Ivory

Recommended for use on soft and hard surfaces. The pad will produce an amazing shine without the 24-hour waiting time for curing. The M44 Ultra Ivory High Speed pad is made from 100% recycled polyester fibers and water-based resins.

<b>Colour</b>	Natural Light
<b>Material</b>	polyester 100% recycled
<b>Thickness</b>	25 mm
<b>Double-sided</b>	yes
<b>Inner hole</b>	85 mm
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

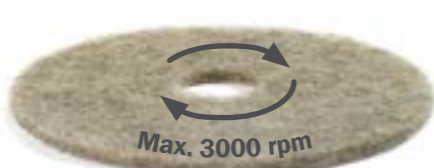

### M56 Natural Light

Recommended for use on soft and medium-hard surfaces. The M56 Natural Light High Speed pad is made from 100% recycled polyester fibers, natural fibers and water-based resins.

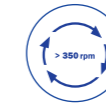

<b>Colour</b>	Natural Grey
<b>Material</b>	polyester 100% recycled
<b>Thickness</b>	25 mm
<b>Double-sided</b>	yes
<b>Inner hole</b>	85 mm
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

### M43 Natural Grey

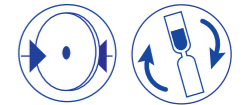

The M43 Natural Grey High Speed pad is a UHS polishing pad that contains the highest proportion of hog bristles in the High Speed pad range. It is ideal for use on firmer and harder surfaces where a more aggressive pad is required to achieve the desired appearance.

### Machine recommendation

### Features

<b>Colour</b>	Champagner
<b>Material</b>	polyester 100 % recycled
<b>Thickness</b>	25 mm
<b>Double-sided</b>	Ja
<b>Inner hole</b>	85 mm
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

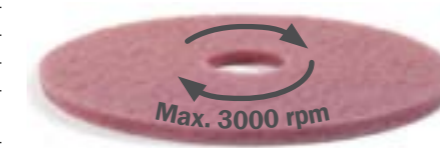

### Champagner

Amazing shine in one pass. Ideal for use on soft to medium-hard floor surfaces. Highly rubberized binder. This pad is recommended for polishing and smoothing glossy floor surfaces.

<b>Colour</b>	UHS Peach
<b>Material</b>	polyester 100 % recycled
<b>Thickness</b>	25 mm
<b>Double-sided</b>	Ja
<b>Inner hole</b>	85 mm
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

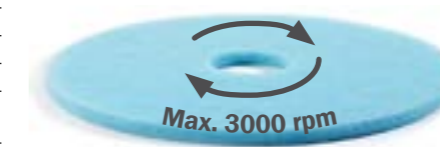

### M59 UHS Peach

The pad has a special binder composition that makes it possible to effectively remove black footprints and restore the shine at the same time. The M59 UHS Peach High Speed pad is made from 100% recycled polyester fibers and water-based resins.

<b>Colour</b>	UHS Blue
<b>Material</b>	polyester 100 % recycled
<b>Thickness</b>	25 mm
<b>Double-sided</b>	Ja
<b>Inner hole</b>	85 mm
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

### M57 UHS Blue

Recommended for use on all surfaces. Excellent for the treatment of high-gloss polished surfaces. Made from 100% recycled polyester fibers and water-based resins.

<b>Colour</b>	Aqua Light
<b>Material</b>	polyester 100 % recycled
<b>Thickness</b>	25 mm
<b>Double-sided</b>	Ja
<b>Inner hole</b>	85 mm
<b>Application</b>	stubborn stains effectively dissolved
<b>Use</b>	wet

### M46 Aqua Light

Recommended for use on soft and hard surfaces. The pad produces an amazing shine without the long waiting time for curing. The pad is made from 100% recycled polyester fibers and water-based-resins.

Further information can be found in the WCP online shop <https://www.weber-cp.com>

Full Cycle® product

# SmartScrub™ pads

JANEX®

## Completely without chemicals!

### A high-performance pad ideal for polishing and cleaning

Suitable for vinyl, stone floors, terrazzo, concrete, marble, granite and rubber floors. A special diamond mixture, especially for maintenance cleaning of shiny floors that are exposed to high visitor frequency. Best used with single-disc or scrubbing machines up to 350 rpm for daily cleaning.

The SmartScrub™ consists of two layers. It is used until the yellow carrier layer, the „working layer“ appears.

### Shine on almost any floor!

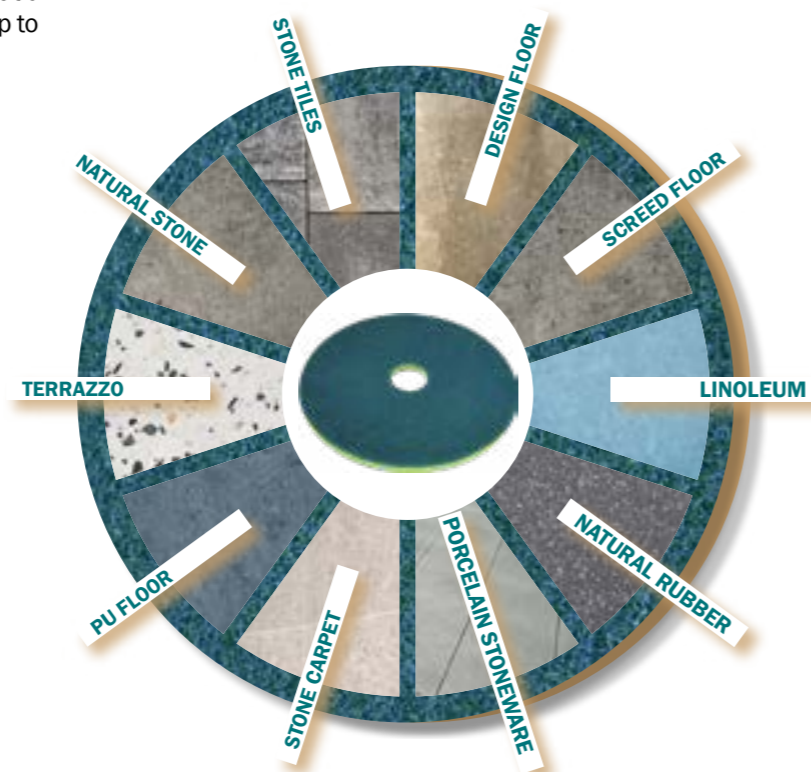

For coated floors as well as natural and concrete stone floors without coating. Excellent for removing dirt and polishing. Daily cleaning of floors with SmartScrub™ pads requires no chemicals. Perfect for use on automatic cleaning machines. Ideal for machines with speeds up to 350 rpm.

### Application

The floor shine is sustainably ensured with simultaneous cleaning. Mainly used on coated floors, in some cases also on uncoated floors. For floor coverings with wax or polish treatment, the SmartScrub™ pad helps to significantly extend the treatment intervals. The SmartScrub™ is ideal for removing dirt and polishing. For use with water only on single-disc machines and scrubbing machines. Ideal for machines with speeds up to 350 rpm.

### Sustainable

SmartScrub™ pads are made from recycled PET in an environmentally friendly way.

### Machine recommendation

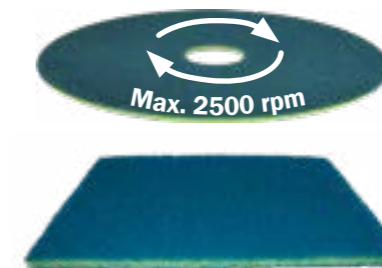

### Features

<b>Colour</b>	blue/yellow
<b>Material</b>	polyester 100% recycled
<b>Thickness</b>	25 mm
<b>Application</b>	for polishing and cleaning
<b>Use</b>	wet

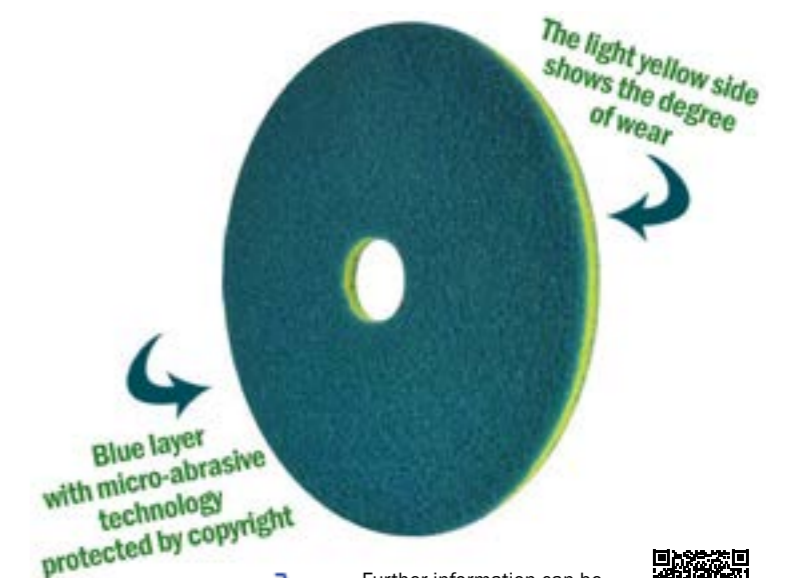

### SmartScrub™ pad

The SmartScrub™ pad consists of polyester fibers in a fleece composition. Economical, as cleaning and polishing are carried out in one operation. Very long-lasting and durable (lasts approx. 5 times longer than conventional floor cleaning pads). The different layers clearly show when the pad is used up and save uncertainty. Environmentally friendly, as the pad is only used with water. To use, mount the pad on the respective drive plate of the machine. Rinse thoroughly with water after each use. Use until the blue „working layer“ has worn off and the yellow carrier material appears.

### Advantages:

- Sustainable cleaning
- Cost efficiency
- 80% bacteria reduction compared to traditional cleaning methods
- Application without chemicals
- Brilliant results all year round

Further information can be found in the WCP online shop <https://www.weber-cp.com>

Full Cycle® product

# Abrasives

Sanding grid

Sanding paper

Steel wool pads

## Ideal for wooden and stone floors!

### Sanding mesh pads

The optimum processing of wooden and stone floors thanks to an open structure meets the highest quality standards. The backing material is coated with silicon carbide. Sanding meshes are commonly used for removing and repairing coatings from the surface of wooden floors. They can be used on all conventional single-disc or orbital machines. The coarse mesh structure ensures a high removal rate.

### Sanding paper pads

The sanding discs are ideal for refurbishing wooden floors and offer a broad spectrum from removing the old finish to fine sanding.

### Steel wool pads

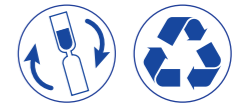

Ede!Steel wool and CarbonSteel wool pads are used for polishing granite. Polishing milk, polishing powder or alternatively technical wax is required for the application.

	Sanding mesh pads	Sanding paper pads	Steel wool pads
<b>Features</b>	abrasive	abrasive	crystallisation
<b>Durability</b>	✓✓✓✓	✓✓	✓✓✓✓
<b>Grinding performance</b>	✓✓✓✓	✓✓✓✓	✓✓✓✓
<b>Dirt absorption</b>	✓✓✓	✓✓	✓✓✓✓
<b>Surface refinement</b>			✓✓✓✓
<b>Application</b>	Removal of e.g. old coating on floorboards	Removal of e.g. old coating on floorboards	Cleaning and crystallization of marble and natural stone floors

### Machine recommendation

### Features

<b>Colour</b>	black
<b>Material</b>	carrier material is coated with silicon carbide
<b>Thickness</b>	5 mm
<b>Graining</b>	coarse 40, 60, fine 80, 100, 120, super fine 150, 180, 220
<b>Application</b>	repairs of floor coating
<b>Use</b>	wet and dry

### Sanding mesh pads

For the preparation of gym floors, the use of sanding meshes is ideal. They are also ideal for repairing painted floors.

We recommend placing a Maroon pad between the sanding disc and the adhesive layer. This has two advantages:

1. the sanding disc coating is better protected against damage.
2. the Maroon pad binds some of the sanding dust and ensures longer working intervals without interruption.

When sanding parquet flooring, place a Maroon pad between the sanding grid and the adhesive layer!

<b>Colour</b>	black
<b>Material</b>	carrier material is coated with silicon carbide
<b>Thickness</b>	5 mm
<b>Graining</b>	super coarse 12 coarse 16, 24 medium 36, 40, 60 fine 80, 100, 120
<b>Application</b>	refurbishing wooden floors
<b>Use</b>	dry

### Sanding paper pads

With the different grit sizes (12, 16, 24, 36, 40, 60, 80, 100, 120), they are ideal for reconditioning wooden floors and offer a wide range from old flooring to fine sanding.

<b>Colour</b>	grey
<b>Material</b>	steel wool carbon steel
<b>Thickness</b>	ca. 20 mm
<b>Graining</b>	grade 0
<b>Application</b>	marble and natural stone floors
<b>Use</b>	wet and dry

### Steel wool pads carbon

This pad is suitable for cleaning, finishing and crystallization (in combination with acidic solutions) of stone floors (marble, terrazzo, travertine and concrete). It can also be used dry.

<b>Colour</b>	grey
<b>Material</b>	stainless steel wool
<b>Thickness</b>	ca. 20 mm
<b>Graining</b>	grade 1
<b>Application</b>	marble and natural stone floors
<b>Use</b>	dry

### Stainless steel wool pads

By processing calcareous minerals with steel wool pads in combination with acidic solutions, an enrichment of microfine crystals (surface hardening) is achieved. It can also be used dry.

Further information can be found in the WCP online shop <https://www.weber-cp.com>

# Flex Scrub™ Brush pads

## Ideal for thorough cleaning of linoleum, PVC and tile

Flex-Scrub™, the ultimate bristle floor pad that attaches as quickly and easily as a traditional floor cleaning pad, yet provides a much more thorough clean. Flex Scrub™ penetrates deep into joints and textures where traditional floor pads cannot reach.

**The Flex Scrub™ pads can be used as a replacement for Super pads in the respective color. Up to 100 Super pads can be replaced with one Flex Scrub™ pad.**

Flex Scrub™ fits most conventional machines with 175 – 350 rpm.

The Flex Scrub™ is easy to use, there is no need to stop and flip, the brush pads do not stick together when cleaning and stripping.

They are self-cleaning, so there is no need to wash them out. They are also flexible and lightweight, making them easy to handle.

### Machine recommendation

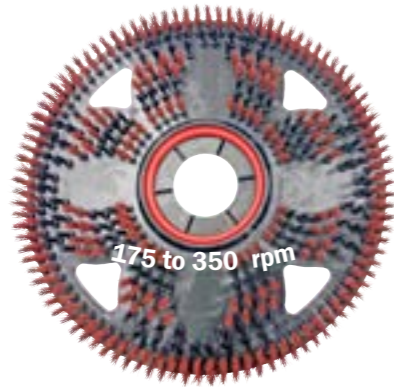

### Features

### Flex Scrub™ Brush red

<b>Colour</b>	red
<b>Thickness</b>	30 mm
<b>Beborstung</b>	grit 500 - red
<b>Application</b>	terrazzo, vinyl tiles, ceramic tiles, linoleum, rubber studded floors, epoxy resin floors, slip-resistant, marble
<b>Use</b>	wet and dry
	Daily maintenance cleaning

For the daily maintenance cleaning of linoleum, PVC and tiles. Used in supermarkets, hospitals, retail outlets, fitness studios, etc.

### Flex Scrub™ Brush green

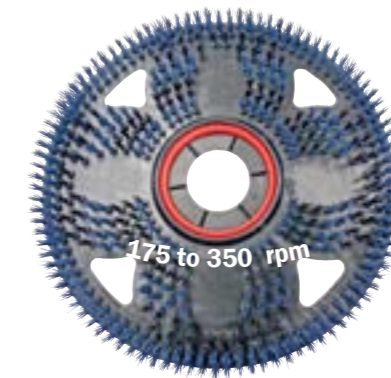

<b>Colour</b>	green
<b>Thickness</b>	30 mm
<b>Beborstung</b>	grit 120 - green
<b>Application</b>	terrazzo, vinyl tiles, terrazzo floors, ceramic tiles, linoleum, lightly soiled concrete, rubber studded flooring, epoxy resin floors, slip-resistant
<b>Use</b>	wet and dry
	Daily maintenance cleaning

For maintenance cleaning of non-sensitive mineral floor coverings, epoxy resin floors and tiles. Application in industrial halls and warehouses, workshops, production facilities, etc.

### Flex Scrub™ Brush blue

<b>Colour</b>	blue
<b>Thickness</b>	30 mm
<b>Beborstung</b>	grit 180 - blue
<b>Application</b>	terrazzo, vinyl tiles, ceramic tiles, linoleum, lightly to heavily soiled concrete, Luxury vinyl tiles
<b>Use</b>	wet and dry
	Daily maintenance cleaning

Intensive cleaning of insensitive mineral floor coverings, epoxy resin floors and tiles. Used in industrial halls and warehouses, workshops, production facilities, etc.

### Flex Scrub™ Brush black

<b>Colour</b>	black
<b>Thickness</b>	30 mm
<b>Beborstung</b>	grit 80 - black
<b>Application</b>	terrazzo, vinyl tiles, ceramic tiles, linoleum, lightly to heavily soiled concrete
<b>Use</b>	wet and dry
	Cleaning and decoating
	Daily maintenance cleaning

The black bristles are used for effective basic cleaning and the removal of old coatings. Heavily soiled concrete and stone floors are thoroughly cleaned and old coatings are easily removed.

#### Patented Flex Coupling

Easy installation on any pad drive plate with snapper / pad centering.
